OTHERS LIKELY TO COME IN

Those Now in Consolidation include the American and Red Star Lines, White Star Line, Dominion Line, Atlantic Transport Line and the Leyland Line Will be Controlled on this side.

(By Associated Press.)

NEW YORK, April 19 .- J. P. Morgan, who is now abroad, has practically consummated a combine to control all the leading trans-Atlantic steamship lines. London dispatches to the Associated Press aurouncing the combination were to-day confirmed at the Morgan banking house. The companies to be consolidated will, it s understood, include the American and Red Star Lines, White Star Line, Dominion Line, Atlantic Transport Line and the Leyland Line. The two last named lines have been un

der Morgan control for some time. Prob-able additions to this list are the Cunard, Wilson and Holland-American Companies; and it is understood that a "work ing agreement" will be reached with the other leading trans-Atlantic companies, including the North German-Lloyd, Hamlurg-American, General Trans-Atlantic (French), and Allan and Anchor Lines.

Mr Morgan has given the matter much
of his time since his arrival on the other side In this country the more important details have been in the hands of Clem-ent A. Griscom, of the American Line, while Charles Steele, Mr. Morgan's partner in this city, has charge of the legal preliminaries.
BIG CAPITAL.

It is yet too early to give the exact cope of the scheme, but as now outlined, scope of the scheme, but as now outlined, there will be an American holding company, into which all the steamship companies which propose to enter the combine will put their stock holdings—"pool their issues"—in exactly the same way that the various concerns embraced in the United States Steel Corporation threw in their boldings, receiving in return stock of the main, or parent company. Just what the capitalizatoin of the com-pany will be is not yet known, but the amount is likely to be well in excess of \$150,000,000. This phase of the project will depend entirely upon the number of steamship companies taken into the com-

One of the most interesting features of One of the most interesting features of the plain deals with the subsidy question. The White Star and Cunard Lines receive liberal subsidies from the British Govern-ment. These subsidies would be with-held or abrogated if the ships of these lines changed their flags from British to American. Because of this, the ships of the White Star, Cunard and the English subsidized will doubtless continue numiunder their control.
RULE MERCHANT MARINE.

Mr. Perkins, of J. P. Morgan and Company, is authority for the statement that American interests will dominate the pro-posed amalgamation, and declares that the result will prove not only a great triumph for Mr. Morgan, but will make the United States the real ruler of the merchant marine of the world.

Mr. Perkins also says that the plan

It is taken as a matter of course, that the interests now prominent in the vari-ous steamship lines will be taken into the consolidated directory. Banking interests identified with the

proposed underwriting syndicate, said to-day that the new company would have a New Jersey charter. They thought that no very great amount of cash contribu no very great amount of cash contribu-tions would be required from the un-derwriting syndicate, but were reticent as to how far the owners of underlying companies had the option to take new stock or cash. FIRST ENGINE OF FIRST SIZE FOR RICHMOND FIRE DEP'T.

RICHMOND'S NEW FIRST SIZE FIRE ENGINE.

The Board of Fire Commissioners will, in a short time, place an order with the La France, or the American Fire Engine Company, for a large fire engine to be located on North Third Street, near Broad. The engine will probably be a first size engine. There are now two second size engines and six of the third size in Richmond. The companies constructing fire engines turn out six sizes, which are graded by weight and capacity in gallons per minute. The smallest, or fourth size, weighs 5,000 pounds and throws 500 gallons per minute, according to the builders' catalogue, the third size 6,000 pounds and 600 gallons, the second size 7,000 pounds and 700 gallons, the extra first size 8,500 pounds and 1,100 gallons, and the double extra first size 9,500 pounds and 1,300 gallons. While in a city of as many hills as Richmond, the largest size engines have serious drawbacks, it is argued that a large engine should be put near Third and Broad Streets for the better protection of the Broad Street business district.

Association will meet in this city on June 2d or 4th to make a selection and to let the contract for the erection of the arch. June is fixed for the time of meeting, so that the ladies may be here on June 3d, the birthday of Mr. Davis.
